

Diabetes Summary Screen – With and Without Performance Measures

The summary screen now displays individual physician performance on specific diabetes indicators along with the information for each patient. This has proven to slow the system down to the point that there is concern that its load time will prohibit physicians from using the summary screens at all. Therefore, in the near future the physician performance bars will be removed.

1) With Performance Measures

- Diabetes Mellitus PQRI Performance Measures

This Patient	Measure	My Performance
<input type="radio"/>	1: Annual HbA1c	
<input type="radio"/>	2: HbA1c < 9.0%	
<input type="radio"/>	3: BP < 140/90	
<input type="radio"/>	4: Annual LDL Cholesterol	
<input checked="" type="radio"/>	5: LDL Cholesterol < 130	
<input type="radio"/>	6: Annual Microalbumin	
<input type="radio"/>	7: Annual Eye Exam	
<input type="radio"/>	8: Annual Foot Exam
