These are the telephonic interactive voice response system (IVRS) scripts used to collect family history of cancer, heart disease, and diabetes, before and after a clinical visit.
PREP Intervention: Interactive Voice Response System Scripts
We are calling from <CLINIC NAME>. We are asking you to participate in a study called PREP, to help patients and their doctors talk about and understand their health risks.

Your answers will be used to estimate your risk of developing cancer, heart disease, and diabetes. After you complete the call, we will send you a personal risk report that will give you some simple tips to improve your health. If you agree to participate, today's phone call will take about 10 to 15 minutes.

Some patients will be asked to take part in a 5 minute phone survey after their visit to tell us about their experience. Patients who complete the second survey will be entered into a monthly drawing to receive one of two $100 Target gift cards.

The information that you provide will be kept confidential, but will be available to your primary care team and may become part of your medical record. Participation in this study is voluntary.
Would you like to participate in this study?

Yes

Thank you for agreeing to participate. We now need to confirm your identity. Please say your date of birth, by saying the month, day and year, for example March 21st, 1975.

Date of birth

YES

Go to Adopted

No

Sorry, We're having trouble verifying your date of birth. We can't continue without it.

Thank you for taking the time to talk with us.

Good bye.

Hang up
First we would like to get some information about the health of your family members. This will help us understand your health. We are going to ask you about common diseases like cancer, heart disease, and diabetes.

Unfortunately, we cannot ask about all conditions, so please discuss any conditions that we do not ask about with your primary care doctor.

 Were you adopted? (We are asking to find out about the health of your blood relatives)

 Yes

 The next few questions ask about the health of your blood relatives. Since you were adopted, you may not know about the health history of your blood relatives. Do you know about the health of your blood relatives?

 No

Patients who complete this phone call will be entered into a drawing to receive one of two $100 Target gift cards given away this month.
Before we begin, I want to let you know that this survey may be monitored for quality assurance purposes.

Please help me to make sure that I have reached the correct person by telling me your birth date by stating the Month, Day and Year. For example, if your birthday is August 1, 1960, you would say, ‘August 1, 1960.’

<1> PERSON GIVES CORRECT DATE {goto IVRInvite}
<2> BIRTHDATE DOES NOT MATCH {goto VerifyAgain1CATI}

The birth date you stated does not match our records, could you please say it again? Remember to state the month, day and year.

<1> PERSON GIVES CORRECT DATE {goto IVRInvite}
<2> BIRTHDATE DOES NOT MATCH {goto VerifyAgain2}

I’m sorry, but the birth date is still incorrect, could you please say it again?
